2016 Photo Contest

Category Explanations

People

This image must focus on a person or people. Creative angles, emotion or use of light is encouraged.

Landscape/Nature

This image must be about natural things that are NOT human-made. Subjects such as trees, seascape, hillsides, butterflies or animals would fit into this category. Destruction of nature or competition of man and nature are just as good. Landscape or Macro is welcomed. Creative uses of light, focus, and composition are suggested.

Creative Shutter Effects

This image must show skill in using slow or fast shutter speed with a subject. For example shooting a waterfall or a seascape with a slow/fast shutter speed to emphasize the blurry/frozen motion of the water, use of a fast shutter for a sharp focus sports image that captures the impact of a ball with an athlete in a frozen split second of time. Abstract experimental images are equally welcomed. Multiple exposures in one image or painting with light while using a slow shutter are other examples.

Computer Manipulated

The image must be manipulated/edited using a digital software program such as Photoshop. The manipulation must be obvious. Examples could include, but not limited to surreal images, pop art, abstract, fantasy, or caricatures. All effects were created with the use of a computer.
